

Autodesk Project Dragonfly

Enter the Dragonfly Design Wing.

Welcome to Design Wing, the [Autodesk Project Dragonfly](#) community. Each week, thousands of do-it-yourselfers and professionals visit Project Dragonfly, looking for ways to enhance the indoor/outdoor space around them. Like you, they're having fun, making their world a better place.

Congratulations on taking the first step!

By registering with [Project Dragonfly](#), you're on the right path. Now watch your ideas take wing. Along the way, here are some tips to help you design, and share designs, online.

Tip #1: Take Advantage of New Features

It's easy to sketch ideas and inspirations with Project Dragonfly. Especially with the [new features added in May](#), many of which are direct responses to your feedback:

Resizable items

Resize furniture for better fit. Simply click on a corner and drag.

Design aids

Move items and align like-to-like furniture in different room settings.

More 3D

Bring your drawings to life. Open up walls; add windows. Let in the light.

Furniture and fixtures

Hundreds of new furniture items **just added last week**. Check them out!

Tip #2: Share Your Designs

Use the Share feature on the Designer tab to forward a direct link to your designs. Invite friends and professionals to take a look, offer opinions, and add ideas of their own.

If you've saved any sample layouts to Dragonfly, you'll find it simple to organize, edit, or remove these designs in the **My Designs** area of the application once you've logged into your account.

In no time, you can cull through your floor plans, find the ones you like most, and post them to the [Dragonfly Gallery](#). Open your designs to the public by selecting one in My Designs and choosing "Public".

Whether you're planning a major home improvement, or simply working on a favorite pet project, you've taken an important step on a fun and creative path. Now watch your ideas take wing.

[GET STARTED!](#) 

Sincerely,
The Project Dragonfly Team at Autodesk

P.S. For more information on the very latest Dragonfly features, check out [What's New](#). And keep your suggestions coming! Every time you design a space or offer a suggestion, you're helping to make Dragonfly easier for everyone to use.
